PROFESSIONAL SUMMARY

Frontend Engineer with hands-on experience in web development using **Next.js** and **React**. Strong focus on clean, user-friendly design and usability. Experienced in both independent and collaborative development environments.

EXPERIENCE

Computiq

June 2026 – Present

Technical Support Intern

- Performed testing and quality checks on products to identify issues before release.
- Created and maintained technical documentation to support internal processes and product understanding.
- Built and managed Excel files for tracking, reporting, and organizing data.
- Provided general technical support across various tasks related to the field as needed.

ACADEMIC PROJECTS

Weekly Schedule | *Next.js, React, JavaScript* [Live Demo](#) | [GitHub](#)

- Designed and developed a student scheduling web application focused on simplicity and ease of use.
- Implemented conflict detection logic to prevent overlapping time slots.
- Built a clean and intuitive interface to improve user experience.

Exam Scheduler | *Next.js, React, Express.js, SQL* [GitHub](#)

- Developed a web-based system to manage university exam schedules efficiently.
- Implemented scheduling validation to detect and prevent exam conflicts.
- Designed separate interfaces for administrators and students.
- Collaborated in a two-person team, focusing on correctness and system design.

PERSONAL PROJECTS

Portfolio Website | *Next.js, React* [Live Website](#)

- Designed and developed a personal portfolio website to showcase projects and skills.
- Focused on responsive design and clean, user-friendly interface.
- Deployed online for public access and project demonstration.

EDUCATION

Near East University

January 2026

Bachelor of Science in Software Engineering

SKILLS

Frameworks & Libraries: Next.js, React, Express.js

Languages: JavaScript, TypeScript, SQL, Python, C, C++
